STANDARD GARBAGE CHUTES

SEGRAGATED GARBAGE CHUTES

DEBRIS CHUTE (FOR UNDER CONSTRUCTION)

ACROW PLAST is top manufacturer of High Quality Debris Chute. ACROW PLAST provides you and your team simple and more automated alternative which is cost effective for fast/quick removal of construction waste all the way from top to bottom at one point.

PROBLEM WITHOUT DEBRIS CHUTE?

- Can cause fatal accidents.
- Slower project finishing work.
- High cost for handling more manpower.
- Unsafe practice of disposing debris openly leads to high dust pollution.
- Unfortunately no one wants to face/stuck in any legal liabilities. In this connection we ask everyone to associate & joint hands for safe practice of debris disposal as per norms.

KEY FEATURES & ADVANTAGES OF ACROW DEBRIS CHUTE.

- Available in a number of sizes and thickness.
- Manufacturers as per floor to floor height
- 70% light weight instead of metallic chute
- Lower noise level - echo proof
- Highly non conductivity of electricity (shock proof)
- Non-corrosive / Dust Proof
- Reusable from one project to another.
- Easy to Reinstall / Easy to Dismantle.

MOC	Chute Diameter	Thickness	Height
Polyglass	600 MM	5 MM	0 Rmt - 140 Rmt
Polyglass	750 MM	8 MM	140 Rmt – 240 Rmt
Polyglass	900 MM	10 MM	140 Rmt – 300 Rmt

GRP FINS / JALI / SCREEN

Fins are important part of construction which is mostly install exterior & interior.

We Design, Supply & Install Fins as per requirement in various size, shape & shade with vertical and horizontal type create a unique visual appeal.

Applications

External protection to all windows, doors, openings, etc. in any housing, commercial, warehouses, residential buildings.

Advantages

- Advantageous strength/weight ratio and rigidity.
- Moulding size virtually unlimited.
- Considerable design versatility.
- Choice of wide range of Inbuilt color-Maintenance free finishes.
- Easy to handle and install at site.
- Excellent water, chemical & termite resistance.
- Resistant to weathering and UV exposure (U/V stabilized).
- Fire retardant.
- Good electrical and thermal properties.
- Good aesthetic appeals, strength, durability, waterproof & lightweight.
- Good dimensional stability at high temperatures. (Unlike PVC or MS)
- Very high impact strength-used for body covers of high-speed cars etc.
- Excellent Thermal insulation.
- Excellent mechanical/physical & biological properties.
